SUMMARY

Front-End Developer with extensive experience building scalable, user-focused web applications using modern frameworks such as Angular, React and Vue.js. Utilizing Blazor as well for integrated C# development. Skilled in front-end architecture, performance optimization, and cross-functional collaboration to deliver secure and efficient solutions. While specializing in front-end development, I am adaptable to support other technologies and continuously expanding my expertise in React and Python.

TOOLS AND TECHNOLOGIES

- **Languages:** C#, Java, Python
- **Frontend:** Angular, Vue, React, Blazor
- **Backend & Cloud:** .NET, Semantic Kernel, AWS, AZ-900 Certified
- **Security & Testing:** Checkmarx, Snyk, Whitesource (Mend), Jasmine, Karma
- **Tools:** Visual Studio Code, Visual Studio, Git, GitHub, Node
- **Currently Learning:** React, Semantic Kernel, Python through project work

WORK EXPERIENCE

UI SYSTEMS ENGINEER

Willis Towers Watsons Aug 2022 - present

- Led the design and development of scalable front-end applications using modern frameworks such as Angular and Blazor, ensuring alignment with business goals and user experience standards.
- Drove architectural decisions by researching emerging technologies and facilitating discussions with the development team to determine optimal framework updates and code structure strategies.
- Championed reusability and efficiency by initiating and overseeing the creation of shared Angular modules and component libraries, enabling consistency and faster development across multiple applications.
- Fostered cross-functional collaboration by working closely with back-end developers and UX designers to enhance application performance and streamline user navigation.
- Ensured application security and compliance by proactively investigating and resolving vulnerabilities identified through tools like Checkmarx, Snyx, Whitesource, embedding security best practices into the development lifecycle.

FULL STACK DEVELOPER

DXC Technology May 2019 - July 2022

- Hands-on experience architecting and developing applications using a diverse technology stack including Angular, HTML5, CSS3, Bootstrap, JavaScript, TypeScript, JSON, Node.js, Java, Spring Boot, D3.js, PostgreSQL, MSSQL, Azure, and Git—demonstrating versatility and depth in full-stack development.
- Led the development of Progressive Web Apps (PWAs) for both client-facing platforms and internal tools, enabling data processing, analysis, and visualization to enhance customer understanding and decision-making.
- Collaborated closely with cross-functional teams—including project managers, product owners, developers, and QA engineers—to identify challenges, define testing strategies, and establish development best practices that improved delivery outcomes.
- Streamlined onboarding and team efficiency by creating comprehensive technical and non-technical documentation, empowering new team members to integrate quickly and contribute with minimal disruption.
- Provided technical leadership across multiple development teams, guiding the implementation of scalable solutions that met complex project requirements and aligned with organizational goals.

APPLICATION SYSTEMS ENGINEER

Fujitsu PH Feb 2016 - May 2019

- Led a cross-functional development team in designing and delivering a systematic and responsive web application for monitoring various request types, ensuring alignment with operational needs and user expectations.
- Facilitated strategic communication with multiple teams to gather feedback, propose enhancements, and implement recommendations that improved project outcomes and user satisfaction.
- Directed front-end architecture and design, creating responsive layouts or both admin and end-user interfaces using AngularJS, with a focus on usability and scalability.
- Engineered backend integration, developing lightweight APIs using Exchange Web Services (EWS) to support scheduling, memo management, and note-taking functionalities.
- Promoted quality assurance and automation, implementing Selenium-based testing scenarios and leading the development of unit tests for both Java and JavaScript applications to ensure robust and maintainable code.

SIDE PROJECTS

DEVELOPER PORTFOLIO (REACT + TAILWIND CSS)

Feb 2025 - Apr 2025

- Designed and developed a personal interactive portfolio to showcase professional experience and side projects.
- **Tech Stack:** React.js, Tailwind CSS, Vite, Netlify
- **Key Contributions:**
  - Built responsive layouts, animations, and modular components.
  - Integrated resume downloads, project sections, and interactive navigation.
- **Impact:** Demonstrated continuous learning and applied modern front-end design principles.

NATURAL LANGUAGE TO SQL (AI-POWERED DATA QUERY APPLICATION)

Feb 2025 - Apr 2025

- Developed an AI-driven solution enabling business users to query databases using natural language instead of SQL.
- **Goal:** Empower non-technical users to access and explore data independently.
- **Tech Stack:** Blazor, .NET 9, Microsoft Semantic Kernel, Azure OpenAI, Azure SQL, Azure App Service
- **Key Contributions:**
  - Implemented Semantic Kernel for prompt orchestration and skill management.
  - Integrated Azure OpenAI GPT models to convert plain English to SQL queries in real time.
  - Deployed using Azure Infrastructure for secure, scalable operations.
- **Impact:** Reduced data retrieval time and improved accessibility of insights for business stakeholders.

DDA (DATA-DRIVEN REAL ESTATE PLATFORM)

Feb 2024 - Mar 2025

- Developed a web application to centralize and visualize property data across multiple locations.
- **Tech Stack:** Vue.js, Ruby on Rails, AWS
- **Key Contributions:**
  - Implemented AI-based OCR for automatic data extraction.
  - Built dashboards with visual analytics (pie, line, bar charts) and Google Maps integration.
- **Impact:** Streamlined data reporting and enabled data-driven decision-making.

DERMVISION (AI-INTEGRATED DERMATOLOGY WEB APPLICATION)

Aug 2021 - Jan 2022

- Built a full-stack AI-powered application for a dermatology clinic to analyze facial images and identify acne-prone skin.
- **Tech Stack**: Vue.js, Python, Azure Resources
- **Key Contributions:**
  - Integrated machine learning for image-based skin analysis.
  - Designed a responsive, user-friendly interface for clinic staff and patients.
- **Impact**: Enhanced clinic workflow and provided faster, more accurate assessments.

CUSTOM WORDPRESS APPLICATIONS

Mar 2020 - May 2020

- Created and customized multiple WordPress websites tailored to client branding and design needs.
- Enhanced UI/UX, optimized responsiveness, and improved SEO.
- Delivered visually cohesive and performant web experiences aligned with client goals.

EDUCATION HISTORY

BS in Computer Engineering ***De La Salle University - Manila*** May 2010 - Dec 2015
